July 2025

July in Pensacola: Celebrating Freedom, the Blue Angels, and a Safer Community Through Stronger Emergency Response

I am thrilled to share meaningful progress we've made to enhance public safety and support the dedicated individuals who serve our community every day. 10 new ambulances have just been commissioned, bringing our total to 22 new units added since October. This continued investment ensures faster, more reliable emergency response services for the people of Escambia County.

We've also approved a 23% increase for starting fire fighter positions. This significant step reflects our ongoing commitment to recruiting and retaining the best emergency professionals to serve and protect our families.

These achievements are a direct result of collaboration, transparency, and a shared dedication to doing what's right for our community. I remain deeply honored to serve as your District 4 Commissioner and will continue working hard for the health, safety, and well-being of all Escambia County residents.

As always, my team and I are here to help. You can reach out any time at district4@myescambia.com.
