## **Example Project Scoring Sheet**

	<b>Scoring</b>	<u>Criteria</u>	<b>Scoring</b>
Baseline Criteria 41%	<u>Scale</u>	<u>Score</u>	Option 2
1. Regulatory Compliance. Applicant has			
described how proposed project will conform			
to all applicable federal, state, and local laws			
and codes including, but not limited to			
American's with Disabilities Act, Rehabilitation	0-2	2	
Act of 1973, U.S. Access Board, National	0-2	2	
Environmental Policy Act, National Historic			
Preservation Act, Davis-Bacon Act, Florida			
Building Code, and Escambia County Land			
Development Code.  2. Project Justification. Proposed project is			
adequately described to determine feasibility			
and the budget includes reasonable and	0-5	5	
justifiable costs.			
3. Timing. Proposed project can be			
implemented and benefits realized within a	0-2	2	
reasonable and acceptable timeframe.	0 2	_	
<b>4. Public Interest.</b> Proposed project is in the			
public interest.	0-2	2	
<b>5. Monitoring Plan.</b> Proposed project includes a	1		
comprehensive monitoring and success	0-2	2	13
measurement plan.	0-2	۷	15
measurement plan.			

Project must score at least 1 in each Baseline Criteria. If not do not proceed with scoring.

## **Environmental Criteria 57%**

1. Habitat kestoration. Proposed project		
improves, enhances, or restores the structure and function of upland, coastal, bays, bayous, wetlands, rivers, lakes, streams, or marine natural systems, benefiting native flora and fauna.	0-6	6
2. Habitat Conservation and Preservation.  Proposed project maintains or improves the structure and function of upland, coastal, bays, bayous, rivers, lakes, streams, or marine natural systems, benefiting native flora and fauna.	0-6	6
3. Water Quality Improvement. Proposed project reduces point and nonpoint sources of pollutants entering local waterways, provides treatment to improve water quality, or proposes other measures which will improve water quality.	0-6	6

4. Natural Systems Resiliency. Proposed project increases ability of natural systems to withstand disasters and adapt to changing environmental conditions due to climate change, associated sea level rise, and other factors.	0-5	5	23
Economic Criteria 37%			
1. Tourism and Tourism Opportunities.  Proposed project provides for increases in tourism activity through new or additional marketing efforts, improvements to existing attractions, or addition of new destinations or attractions.	0-3	3	
2. Job Creation. Proposed project provides for			
new seasonal, temporary, part time, full time, and/or higher wage jobs within the County.	0-4	4	
3. Industry and Business Growth. Proposed project directly contributes to expansion of existing industry/business or siting of a new industry/business in local targeted industries.	0-3	3	
4. Workforce Development. Proposed project provides innovative higher education, job training, or other workforce training/career development which increases the total skilled workforce pool and advances opportunities for higher wage employment.	0-4	4	14
Infrastructure Criteria 42%  1. Transportation Network Improvements.  Proposed project improves components of existing transportation network or adds new features to transportation network such as roads, sidewalks, bike lanes, multi-modal paths or trails, streetlights, and urban/street landscaping.	0-4	4	
2. Flooding Improvements. Proposed project provides structural improvements or additions which will reduce flooding to homes and businesses, thereby reducing overall disaster costs and increasing economic resilience.	0-5	5	
3. Community Resiliency. Proposed project increases community resiliency by strategically retrofitting, upgrading, or replacing critical infrastructure, utilizing renewable energy, or by implementing other disaster preparatory mechanisms.	0-5	5	14

Bonus Criteria 23%

2. Community Health. Proposed project improves physical or mental health of the community through health improvement programs or health education.  3. Neighborhood Benefits. Proposed project provides neighborhood benefit such as increased affordable housing, reduction in crime, or significant aesthetic improvements.  4. Local Preference. Proposed project utilizes local labor force or promotes local small 0-2 2 businesses.  5. Education and Awareness. Proposed project enhances childhood education.  6. Environmental Outreach. Proposed project includes environmental outreach component.  7. Cultural and Historic Resources. Proposed project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements 0-1 1 existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or 0-1 1 other energy and water efficiency/ conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental 0-1 1 funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and 0-1 1 provides long term benefits.  12. Planning and Partnerships. Project planning and design are complete; project 0-1 1	or Areas. Proposed projects improves opportunities for disadvantaged or traditionally underserved persons or areas, such as low-income areas, areas of minority concentration, persons with disabilities, persons with limited English proficiency, etc.	0-1	1
provides neighborhood benefit such as increased affordable housing, reduction in crime, or significant aesthetic improvements.  4. Local Preference. Proposed project utilizes local labor force or promotes local small 0-2 2 businesses.  5. Education and Awareness. Proposed project enhances childhood education.  6. Environmental Outreach. Proposed project includes environmental outreach component.  7. Cultural and Historic Resources. Proposed project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements 0-1 1 existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or 0-1 1 other energy and water efficiency/conservation measures.  10. Leverages funds. Proposed project provides for in-kind or other supplemental 0-1 1 funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and 0-1 1 provides long term benefits.  12. Planning and Partnerships. Project	improves physical or mental health of the community through health improvement	0-2	2
local labor force or promotes local small businesses.  5. Education and Awareness. Proposed project enhances childhood education.  6. Environmental Outreach. Proposed project includes environmental outreach component.  7. Cultural and Historic Resources. Proposed project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or other energy and water efficiency/ conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and provides long term benefits.  12. Planning and Partnerships. Project	provides neighborhood benefit such as increased affordable housing, reduction in	0-2	2
enhances childhood education.  6. Environmental Outreach. Proposed project includes environmental outreach component.  7. Cultural and Historic Resources. Proposed project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or other energy and water efficiency/conservation measures.  10. Leverages funds. Proposed project provides for in-kind or other supplemental plans, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and provides long term benefits.  12. Planning and Partnerships. Project	local labor force or promotes local small	0-2	2
includes environmental outreach component.  7. Cultural and Historic Resources. Proposed project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or other energy and water efficiency/conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and provides long term benefits.  12. Planning and Partnerships. Project		0-1	1
project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and beyond minimum regulatory requirements.  8. Consistency with Local Plans. Proposed project is consistent with or implements 0-1 1 existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or 0-1 1 other energy and water efficiency/ conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and provides long term benefits.  12. Planning and Partnerships. Project		0-1	1
8. Consistency with Local Plans. Proposed project is consistent with or implements 0-1 1 existing adopted plans.  9. Green Design. Project incorporates green design elements such as Leadership in Energy & Environmental Design (LEED) principles or 0-1 1 other energy and water efficiency/ conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental 0-1 1 funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and 0-1 1 provides long term benefits.	project provides for preservation, protection or restoration of cultural, historical, or archaeological significant resources above and	0-1	1
design elements such as Leadership in Energy &  Environmental Design (LEED) principles or 0-1 1  other energy and water efficiency/ conservation measures.  10. Leverages funds . Proposed project provides for in-kind or other supplemental 0-1 1  funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and 0-1 1  provides long term benefits.  12. Planning and Partnerships. Project	project is consistent with or implements	0-1	1
10. Leverages funds . Proposed project provides for in-kind or other supplemental 0-1 1 funding, increasing fund leveraging.  11. Sustainability and Efficiency. The project approach utilizes efficiency measures and 0-1 1 provides long term benefits.  12. Planning and Partnerships. Project	design elements such as Leadership in Energy & Environmental Design (LEED) principles or other energy and water efficiency/	0-1	1
approach utilizes efficiency measures and 0-1 1 provides long term benefits.  12. Planning and Partnerships. Project	provides for in-kind or other supplemental funding, increasing fund leveraging.	0-1	1
	approach utilizes efficiency measures and provides long term benefits.	0-1	1
